

ASTOR ENERJİ A.Ş. AIR POLLUTION POLICY

Astor Enerji believes that preserving and improving air quality is an essential part of sustainable development. In this context, the company adopts a proactive approach to preventing and reducing air pollution. Accordingly:

- Considers the protection of air quality and the prevention of air pollution as one of its core responsibilities and acts in line with this commitment.
- Evaluates risks that may lead to air pollution in all operations, takes necessary precautions, and commits to minimizing environmental impacts.
- Recognizes the importance of innovative and sustainable practices for reducing air pollution and promotes the widespread adoption of such practices.
- Adheres strictly to air quality-related regulations and standards throughout all processes and decision-making mechanisms, and takes fair and informed actions.
- Provides regular training to increase employee awareness of air pollution and to strengthen the company's culture of sustainability.

Astor Enerji aims to create an environmentally friendly and sustainable working environment by integrating the principles of reducing air pollution and protecting clean air quality into all business processes. With this understanding, the company acts not only within its internal operations but also with a strong sense of responsibility toward society as a whole.
