

ASTOR ENERJİ A.Ş. DEFORESTATION POLICY

Astor Enerji adopts a proactive approach to preventing and reducing deforestation with the aim of protecting natural habitats, supporting biodiversity, and ensuring sustainable development. In this regard:

- Adopts the principle of avoiding any activities that may lead to forest degradation across all production, procurement, and operational processes, and commits to acting responsibly and carefully to prevent harm to forest ecosystems.
- Recognizes the value of practices and innovative solutions aimed at preventing deforestation, and promotes the widespread adoption of such efforts.
- Requires its suppliers to implement sustainable practices that are aligned with legal regulations and focused on the protection of forest resources.
- Pays utmost attention to preserving forest ecosystems and natural habitats throughout all operations and commits to minimizing the potential impacts of deforestation.
- Provides training to raise employees' awareness of the impacts of deforestation, the importance of forests, and conservation strategies, thereby reinforcing a culture of sustainability within the company.
- Commits to full compliance with national and international anti-deforestation laws, regulations, and sustainability standards.

Astor Enerji aims to create a sustainable working environment by integrating forest conservation principles into all its business processes. With this understanding, the company acts not only within its internal operations but also with a strong sense of responsibility toward society.
