

ASTOR ENERJİ A.Ş. WASTE MANAGEMENT AND CIRCULAR ECONOMY POLICY

Astor Enerji A.Ş. embraces the principles of waste management and circular economy to conserve natural resources and contribute to a sustainable future. In this regard:

- We take effective measures to minimize waste generation in our operations and carry out continuous improvement efforts to enhance operational efficiency.
- We use natural resources consciously and responsibly, opting for renewable and environmentally friendly solutions to reduce our environmental impact.
- We provide the necessary infrastructure for the segregation, recycling, and reuse of waste, and engage our stakeholders in these processes.
- We plan and implement our waste management practices based on a life cycle approach.
- We prioritize minimizing packaging use and prefer environmentally friendly, recyclable packaging solutions, working in collaboration with our stakeholders throughout these processes.
- We apply circular economy principles in our products and services, aiming to optimize resource use and minimize waste throughout their life cycle.
- We organize training and communication activities to raise awareness among our employees, business partners, and the wider community on waste management and circular economy.

Astor Enerji A.Ş. is committed to fulfilling its environmental responsibilities by contributing to a sustainable future and continuously improving its environmental performance.
